

Smooth rollers.

The roller represents the connecting piece between the chain and sprocket wheel. Beautifully cold-pressed and designed with a uniform wall thickness, CLAAS ORIGINAL chains deliver smooth running with very low self-heating.

Your benefits:

- Optimal power transmission and high output
- Low wear and tear on chain and sprocket wheel
- Noise-dampened chain running

Hard chrome plated bolts.

Bolts are components of the chain link, and optimal hardening of these parts is particularly important. For this reason, CLAAS uses hard chrome plated bolts characterised by high durability.

Your benefits:

- Long service life
- Excellent reliability

Defined and tested hardness profiles.

The forces that act upon a chain are always applied to the same parts. ORIGINAL chains are purposefully hardened at these points to maintain dependable tractive power.

Your benefits:

- Tailored perfectly to the power transmission of your CLAAS machine
- Excellent reliability

Precision-manufactured.

Manufactured from high-quality heat-treated steels, CLAAS side plates are particularly efficient at transferring the chain's tractive force. The intricately manufactured hole quality minimises the risk of torn-out rollers.

Your benefits:

- High breaking strength
- High fatigue resistance

Customized.

CLAAS ORIGINAL parts are precision-manufactured, high-quality series components for CLAAS machines.

Reliable.

CLAAS ORIGINAL parts have a longer life cycle and protect the machine from mechanical failure.

Efficient.

CLAAS ORIGINAL parts are renowned for their high cost-effectiveness, and quality that pays off.

Why CLAAS ORIGINAL chains?

With CLAAS ORIGINAL chains, you can be sure of perfect interaction and an optimal combination of high-quality components – the perfect guarantee of excellent quality and dependability that leaves nothing to be desired. Even the smallest deviations in this respect can have grave consequences for the machine. ORIGINAL chains offer the following benefits:

- Reduced weight
- Defined and tested hardness profiles
- Smooth bushings and rollers
- Hard chrome plated bolts
- In addition, precision-manufactured seals

ORIGINAL parts offer you more than just the right dimensions. The materials and manufacturing methods we use are fundamental to the reliability and long service life of our machines.

Our ORIGINAL parts are manufactured from materials of an exceptionally high quality and to precise CLAAS specifications on the basis of proven CLAAS expert knowledge. Each and every part is tailored to the machine as a whole.
